PROFILE

Software Developer with a production-oriented mindset: I build robust applications made to last, applying rigorous engineering standards from architecture through deployment. Curious and self-taught, I continuously develop my skills to deliver work that meets the standards of a senior technical team.

SKILLS

Backend Development
(Java, TypeScript)
Mobile Development (Flutter)
Software Architecture
Databases
Testing & Code Quality
API & Integrations
Problem Solving

EXPERIENCES

Mobile and Web Developer
Kauza Africa · May 2026 - August 2026 · Lomé, Togo (remote)

Contributed to the development of a fintech platform for the West African market, working across mobile, backend, and web, from architecture design to feature implementation.

Web Developer
ACAN · June 2025 - September 2025 · Lomé, Togo (hybrid)

Built Orientys, a web app delivering AI-assisted higher education guidance based on students' grades, from backend to frontend. Also contributed to mobile applications for THESYMO Technologies, an affiliated company.

Front-end Mobile Developer
Cyber AxD · March 2025 - May 2025 · India (remote)

Design and development of mobile interfaces, with a focus on code quality and user experience. Remote work requiring autonomy.

EDUCATION

Institut Africaine d'Informatique
(IAI-TOGO)
November 2023 - August 2026
Bachelor's Degree in Software Engineering and Information Systems

La Grande Royale
September 2022 - June 2023
High School Diploma
(Baccalauréat)
